Projects

eShopWay [LINK](#)

- Developed eShopWay, a MERN-based e-commerce platform, integrating JWT authentication, a dynamic product catalog, and Stripe/PayPal payment options, with state management handled by Redux.
- Enhanced user experience with real-time chat and notifications using Socket.io for smooth customer, seller, and admin interactions.

Event Management System [LINK](#)

- A full-stack platform for managing events, allowing users to create, organize, and track events seamlessly. It includes features such as user authentication, event creation, and category-based event filtering.
- Built with Next.js (frontend), Node.js (backend), and MongoDB (database), utilizing JWT for authentication and WebSockets for real-time functionality.

IT Infra Solutions [LINK](#)

- Developed and deployed the IT Infra Solutions website using React.js and Node.js. Implemented a responsive user interface, RESTful APIs, and a secure contact form. Ensured cross-browser compatibility and deployed the project on Vercel. Technologies used include React.js, Node.js, Tailwind CSS, Vercel, and Nodemailer.

Certification

Web Development Bootcamp [LINK](#)

- Udemy
